

LOMBRICO

The Lombrico is a remotely operated Mini Excavator, equipped with a suction nose which could be connected to Suction Excavators, Vacuum Trucks, Industrial Aspirators and Dust Aspirators. There is the chance to equip the Lombrico with an external hydraulic power pack, a hose reel and a radio remote control system and a video inspection camera system. During the last years it has become essential into mining operations, in cleaning under conveyor belts and in confined spaces activity. It is possible to remove material from ducts and conducts without creating damages to the working areas.

FEATURES

- Two hydraulic driven rubber tracks
- Hydraulic manual manifold to control all the movements of the machine
- Quick connection system to the hydraulic power pack
- Video inspection system
- Various accessorizes

*The images and technical data refer to machine already in production.
The R&D Department is at disposal to customize the products according to the most various needs.*

ADVANTAGES

- Operator at a safe distance
- Reduction of labour
- Excellent maneuverability
- Time and costs saving

TECHNICAL DATA

SUCTION HOSE FROM/TO

Ø 150 mm | Ø 250 mm

L	1500 mm
H	500 mm
W	450 mm
⚖️	300 Kg

CONFIGURATION WITH

- Vacuum Trucks
- Suction Excavators
- Industrial Aspirators
- Dust Aspirators
- Vacuum Cleaners

APPLICATION FIELDS

Suitable for sucking sedimented material from:

- DUCTS/COLLECTORS/TUNNEL
- LARGE AND SMALL TANKS
- MINES
