ACCESSORIZES FOR LOMBRICO

INTERCHANGEABLE FRONTAL NOSE

BORA NOSE

Tools for Suction Excavators, Vacuum Trucks, Industrial Aspirators, and Dust Aspirators. They are easily adaptable and can be customized according to the work that needs to be done. The tools are developed to reach the customer requests in order to reduce working time, guaranting precise and accurate interventions and safety in confined spaces operations.

The Mini Excavator Lombrico is suitable for cleaning and remediation operation in confined spaces in environmental and building fields to remove the material in syphon galleries, pipes, silos and tanks.

The tools enable the removal of different materials, in different fields and different working conditions.

The R&D Department of Gerotto is continuously updated, to find quick solutions to the everyday problems of cleaning.
